## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 1-3, 5-9, 11, 12 and 21 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Upon thoroughly reviewing applicants' specification; it is noted that the requirement (see claim 1, line 14) that "the supports are independently driven from each other" is new matter. Applicants' specification teaches supports that are movable in paragraphs 36 and 39 but independently movable supports are not taught in the applicants' disclosure. Instead applicants teach in the alternative embodiments of an invention, wherein two tables that are independently movable are disclosed in paragraph 46.

### ***Allowable Subject Matter***

3. Claims 1-3, 5-9, 11, 12 and 21 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Art Unit: 1713

The closest prior art of record, Tisone et al fails to teach each and every limitation of the instant invention. Specifically, fails to teach or reasonably suggest the claimed dispenser for a liquid crystal display panel comprising, among others, supports above the table, the supports being formed in a bar shape to be extended in the direction of the column or line of the image display parts, the supports being separately parallel from each other.

### ***Response to Arguments***

4. The art rejections of claims 1-3, 5-9 and 11-12 has been withdrawn in view of applicants' amendment. However, the 112 1<sup>st</sup> paragraph rejection is maintained as explained above because applicants' specification does not support the limitation that "the supports are independently driven from each other".

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1713

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
